

Product Description **New** Turntable C S01SR

Technical Data

Maximum centric load: 1,000 kg / 2,200 lbs
 Size of turn plate: 660 x 660 mm
 Reference diameter of bore holes: 800 mm
 Diameter of bore holes: 13 mm
 Pedestal size: 660 x 660 mm
 Total height of turntable: 200 mm
 Dead weight: approx. 104 kg / 230 lbs
 Rotating speed: 1.0 rpm

Rotation direction: clockwise (cw)
 Operating voltage: 220 – 240 volt AC, 50 Hz
 Asynchronous Gear Motor: 25 Nm torque
 Power consumption: approx. 130 W
 Rotating power supply by collecting ring for up to 16 A (means approx. 3,500 watt)
 with additional power cord and country specific plug
 Power cord: approx. 2 m with country specific plug
 Color: black / silver

Special Features:

Belt drive, adjustable
 Safety friction clutch by driving belt
 Very low noise
 Outdoor operation: protection category IP 53

Options:

Speed regulation by Frequency Converter
 Rotation direction: counterclockwise (ccw)
 Switch for changing rotation direction
 On request: special functions like reversing operation, cycle operation, stop times, soft start and soft stop.

Available as rental turntable also.

Remark: For all our dimensions and weight specifications the common tolerances are valid.
 Subject to technical changes.
