

Battery Turntable CB040

for indoor use:

The CB040 is a compact battery driven turntable, which may be operated by one or two D-cell batteries, depending on whether single or double lifespan is required. The unit is recommended for indoors as a standing model and may be fixed to a through 4 existing holes in the turntable's bottom rim. The CB040 is a reliable turntable for various constructions, allowing up to 4 kg (8.8 lbs) centric load. The plastic elements supported by a ball bearing on the outer rim of the top plate can withstand the maximum load over several weeks, so that this turntable may often be used for either short time applications at POS or over several months of presentations in shop windows.

Features:

- white ABS-plastic housing and turn plate
- bottom plate with mounting holes
- peripheral ball bearing for preventing tilting effect
- very silent
- maintenance-free
- on/off switch on the housing
