ART WORKING - file supply information

- We output at 150 dpi minimum to avoid pixilation
- We require a high resolution Pdf or Eps file
- Outline all fonts, convert all text to curves
- Save your file as CMYK, we print CMYK
- Advise us of any spot or pantone colours
You are required to supply a test print by post
- We can supply a test print at a cost to be advised and a time delay on production
- Please use this FTP service - www.sendspace.com and send to this address - richard@cokerexpo.co.uk
- Please inform us of any time constraints we are required to work to
- Any further advice required please do call

A stand is described by the number of frame squares wide (panels) x the number of frame squares high. Standard panel height of 2225mm increases to 2958mm for a 4-squares high frame, 3691mm for 5-squares high. Additional stabilising is recommended for increased heights, using either weights or our unique frame support brace. When designing for end panels, consider they wrap to the back of the frame. Up to 60% of the width of an end panel may not be visible from directly in front of the stand and your designer should be made aware of that.
