

Turntable TTC250

The turntable TTC 250 for 25 kg (55 lbs) centric load has a turn plate with large diameter, fixed hollow shaft in the centre and collecting ring option. It provides a wide range of applications. It is appropriate for fix installed lighting on a tube in different lengths. Power supply, lamp holders or devices for fluorescent lamps can be provided standard (i.e. for light cubes). The rotating power supply allows further possibilities. The TTC 250 is also the basic element of the 3level-turntable.
